

Reliable®

Model HL22 (SIN RA1011) K22.4 (320 metric) Early Suppression Fast Response (ESFR) Sprinkler

Product Description

The Reliable Model HL22 is an Early Suppression Fast Response (ESFR) Sprinkler with a nominal k-factor of 22.4 (320 metric). This sprinkler is designed to respond quickly to growing fires with a high volume of water discharge to “suppress” rather than “control” fires.

FM Global classifies the Model HL22 as a quick-response sprinkler, storage and non-storage, when the sprinkler is used in accordance with FM Global Property Loss Prevention Data Sheets.

The Model HL22 sprinkler utilizes a levered fusible alloy solder link in either 165°F (74°C) or 212°F (100°C) temperature rating. The sprinkler has a nominal K Factor of 22.4 (metric 320), and is available with 1” NPT or ISO 7-R1 threads, or with the Victaulic® IGST™ Style V9 Sprinkler Coupling*.

Application and Installation

The HL22 ESFR sprinkler is intended for installation in accordance with NFPA 13 and Factory Mutual (FM) Loss Prevention Data Sheets 2-0 and 8-9, as well as the requirements of any Authorities Having Jurisdiction. See Table 1 for information on NFPA and FM Global design criteria for the Model HL22 sprinkler.

In addition to design criteria permitted by NFPA 13, the Model HL22 also has the following Specific Application Listing from UL, as documented in Table C:

- Sprinkler: Model HL22 in 212°F (100°C) only
- Maximum Ceiling Height: 48 ft. (14.6 m)
- Maximum Storage Height: 43 ft. (13.1 m)
- Minimum Aisle Width: 8 ft. (2.44 m)
- Permitted Commodities: Class I - IV commodities, encapsulated or nonencapsulated, and Cartoned Group A Unexpanded plastics. Permitted Storage Arrangements: Single- and double-row rack storage (no open top containers or solid shelves) and palletized and solid pile storage (no open top containers or solid shelves).
- Minimum System Operating Pressure: 55 psi (3.79 bar).
- Installation and Obstruction Criteria: Same as for K25.2 ESFR sprinklers, but with a maximum deflector to ceiling distance of 14 in. (356 mm)

Follow installation criteria in NFPA 13 or FM Global Property Loss Prevention Data Sheets. For installations using the UL Listed Specific Application Criteria for ceiling heights up to 48 ft. (14.6 m), also follow the additional installation criteria contained in this bulletin.

*Note: Victaulic® and IGST™ are trademarks of Victaulic Company.

Model HL22 Sprinkler

Listings and Approvals

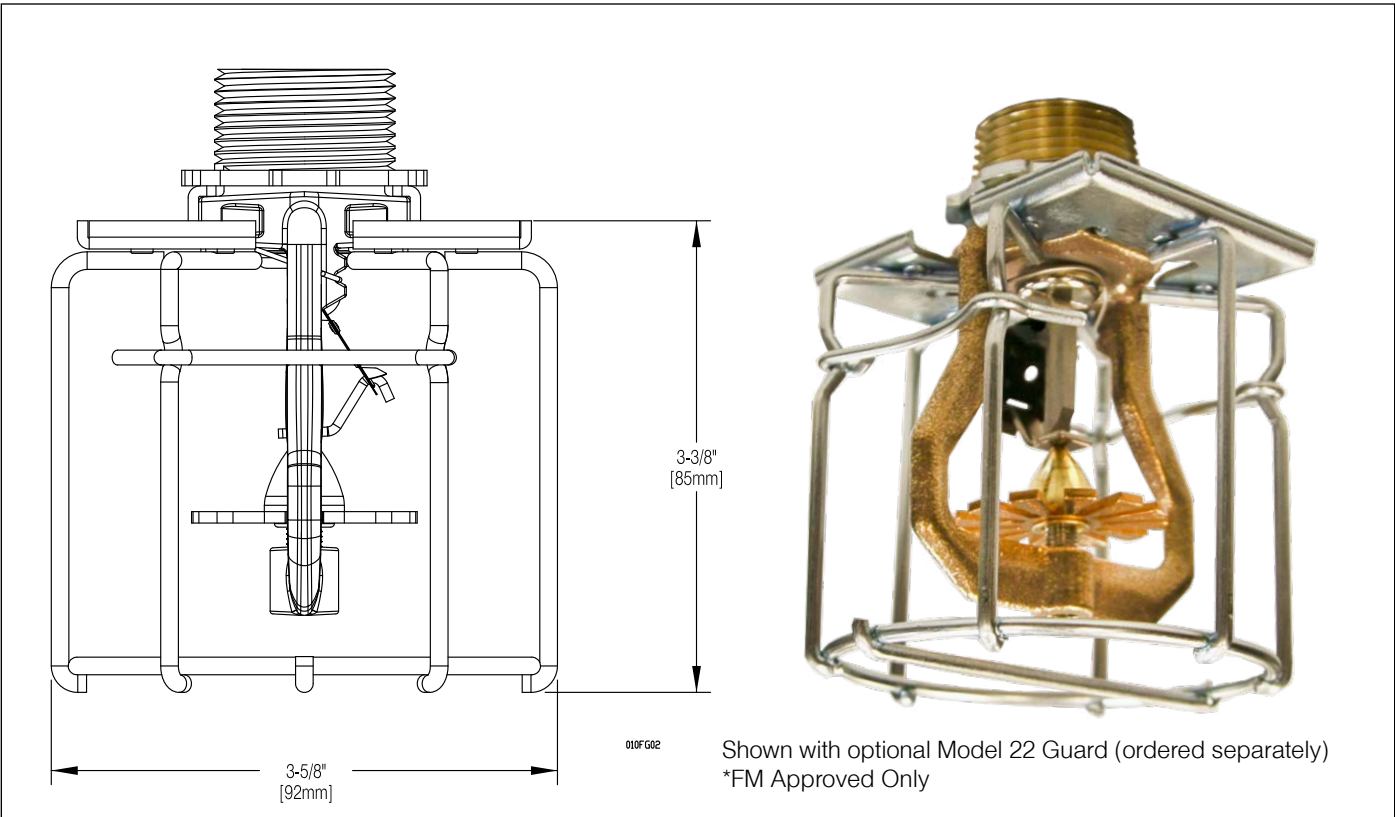

1. Listed by Underwriters Laboratories, Inc. and UL certified for Canada (cULus).
2. FM Approved as a quick-response, storage and non-storage, sprinkler (FM).
3. VdS Schadenverhütung (VdS).
4. Loss Prevention Certification Board (LPCB).
5. CNBOP Technical Approval.

Optional Guards and Water Shields

Sprinkler	Guard or Water Shield	Listings and Approvals
HL22 ESFR Pendent	Model S-5 Water Shield	FM
	Model 22 Guard	FM

Notes:

1. Guards and shields are approved for threaded sprinklers only.
2. Water shield is listed for use only when the sprinkler is installed within racks (IRAS) or under open grating (or similar) areas as required by NFPA or FM standards.
3. Guard is listed for use only when the sprinkler is installed within racks (IRAS).

Model HL22 Technical Data

Table A

ITEM	DESCRIPTION
Sprinkler Identification Number (SIN)	RA1011
K Factor US (Metric)	22.4 (320)
End Connection	1" NPT or ISO7 R-1 threads, IGS™ Style V9 Sprinkler Coupling
Sprinkler Orientation	Pendent
Maximum Working Pressure, PSI (bar)	175 PSI (12 bar)

Model HL22 Temperature Ratings and Approvals

Temperature Classification	Temperature Rating		Link Color	Frame Color	Maximum Ambient Temperature		Approvals	Sprinkler Identification Number (SIN)
	°F	°C			°F	°C		
Ordinary	165	74	Black	Uncolored	100	38	cULus, FM, VdS, LPCB, CNBOP	RA1011
Intermediate	212	100	White	White	150	66	cULus & UL Spec App, FM, VdS, LPCB, CNBOP	RA1011

Installation Data

Sprinkler Type	Nominal Orifice	End Connection	Nominal K-Factor		Maximum Working Pressure
			US	Metric	
Pendent	0.87" (22.1mm)	1" NPT ISO 7-R1 (Optional)	22.4	320	175 psi (12.1 bar)
		1" NPT threaded ISO 7-R1 threaded IGS™ Style V9 Sprinkler Coupling			

Installation

For threaded sprinklers, use only the Model W5 sprinkler wrench. Any other type of wrench may damage the sprinkler. Sprinklers should be tightened between 22 - 30 ft-lbs (30 - 41 Nm) torque. Sprinklers not tightened to recommended torque or tightened past recommended torque may cause leakage or impairment of the sprinkler. Damaged sprinklers must be replaced immediately.

For grooved sprinklers, push the IGS™ Style V9 Sprinkler Coupling onto the grooved outlet until contact with the center leg of the gasket occurs. Align the sprinkler frame arms and the pads of the coupling with the sprinkler piping and tighten the coupling until the pads of the coupling meet. For additional information, please reference Victaulic technical bulletin I-V9.

Caution: When handling sprinklers, hold sprinklers only by the frame arms and do not apply any force on the link assembly.

Fig. 1 - Model W5 Wrench (for threaded sprinklers only)

or damaged in any way. A stock of spare sprinklers should be maintained to allow quick replacement of damaged or operated sprinklers. Prior to installation, sprinklers should be maintained in the original cartons and packaging until used, to minimize the potential for damage to sprinklers that would cause improper operation or non-operation.

Once operated, automatic sprinklers cannot be reassembled and reused. New sprinklers of the same size, type and temperature rating must be installed. A cabinet of replacement sprinklers should be provided for this purpose.

Maintenance

The Model HL22 ESFR Sprinkler should be inspected and the sprinkler system maintained in accordance with NFPA 25. Do not clean sprinkler with soap and water, ammonia or any other cleaning fluid. Remove any sprinkler that has been painted (other than factory applied)

Note: 1" S/142 IGS™ grooved welded outlets are also available from Reliable.

Ordering Information

Specify:

- Sprinkler Model: HL22
- Temperature Rating
 - 165F (74C)
 - 212F (100C)
- End Connection
 - 1" NPT thread
 - ISO 7 R-1 thread
 - Victaulic® IGS™ Style V9 Sprinkler Coupling

Model HL22 ESFR Sprinkler Specification

Sprinklers shall be Early Suppression Fast Response (ESFR) pendent suppression mode sprinklers cULus Listed and FM, VdS, and LPCB Approved for commodity storage applications. Sprinkler frame and deflector to be of bronze construction with deflector located inside of the frame arms. Sprinkler shall have a maximum listed/approved ceiling-to-deflector distance of 18". [Sprinklers shall have a UL Listed Specific Application criteria permitting single- and double-row rack storage (no open top containers or solid shelves) and palletized and solid pile storage (no open top containers or solid shelves) of Class I-IV commodities encapsulated or nonencapsulated and cartoned Group A unexpanded plastics stored up to 43 ft (13.1m) under ceilings up to 48 ft (14.6m) high when installed with 8 ft. aisles, a minimum operating pressure of 55 psi

(3.79 bar), a maximum deflector to ceiling distance of 14 in (356mm), and a temperature rating of 212°F (100°C).]

Fusible alloy solder link assembly shall utilize the strut and lever principle of operation with approved fast response beryllium-nickel thermal element with protective [black painted (165°F)] [white painted (212°F)] coating. Water seal shall consist of a PTFE coated Belleville spring washer and brass cap assembly containing no plastic parts. ESFR sprinklers shall have a nominal K-factor of 22.4 with [1" NPT threaded] [ISO7-1R1 threaded] [Victaulic® IGS™ Style V9 Coupling]. Sprinkler temperature rating shall be [Ordinary 165°F (74°C)] [Intermediate 212°F (100°C)]. ESFR pendent sprinklers shall be Reliable Model HL22, SIN RA1011 (Bulletin 010).

The equipment presented in this bulletin is to be installed in accordance with the latest published Standards of the National Fire Protection Association, Factory Mutual Research Corporation, or other similar organizations and also with the provisions of governmental codes or ordinances whenever applicable.
