

Single Switch Pump Initiation Boards Data Sheet

Pump Initiation Boards are manufactured from quality components to customer's individual requirements.

As standard they are mounted on a white coated melamine back-board and include glycerine filled pressure gauges, no-loss connectors and Bailey & Mackey pressure switches (or alternatives depending on customer's specifications). The pipe-work is assembled using galvanised pipe and fittings and all Pump Initiation Boards are hydraulically tested to 16bar prior to despatch (28bar rated boards are available upon request).

Boards built with a "single switch" arrangement comply with BS5306 Part 2.

SPECIFICATIONS:

FPC Part Number	Description	Height	Width	Depth	Weight
<i>BOA0991WAY</i>	<i>1 Way Single Switch</i>	600mm	400mm	175mm	8kg
<i>BOA0992WAY</i>	<i>2 Way Single Switch</i>	600mm	600mm	175mm	12kg
<i>BOA0993WAY</i>	<i>3 Way Single Switch</i>	600mm	800mm	175mm	20kg
