

# Model F3 Dry Sprinklers

## Features

1. The Model F3 Sprinkler utilizes Belleville Spring Closure Technology
2. Styles available for Model F3 Dry Sprinklers:
  - Pendent
  - Recessed Pendent
  - Concealed
  - Horizontal Sidewall
  - Recessed Horizontal Sidewall
3. 1½" (38mm) escutcheon adjustment on pendent sprinkler.
4. ½" (13mm) escutcheon adjustment on recessed sprinkler with push-on/thread-off FP Model escutcheon ring.
5. ⅜" (9.5mm) cover plate adjustment on concealed sprinkler with push-on/ thread-off CCP cover.
6. Attractive appearance. Employs 5mm frangible glass bulb and galvanized nipple.
7. Lengths available to accommodate installation dimensions from 2" - to - 48" (51mm - to - 1219mm), in ¼" (6mm) increments.
8. Available in a variety of plated and painted finishes.

**U.S. Patent Numbers 5,775,431 and 5,967,240.**

## Approvals

1. Listed by Underwriters Laboratories Inc. and UL  
Certified for Canada (cULus).

Style	Response	Sprinkler System Type	Hazard
Pendent Recessed Pendent CCP Concealed (R5314)	Standard	Wet Pipe Dry Pipe All Preaction	Light Ordinary
Horizontal Sidewall Recessed Horizontal Sidewall (R5334)			

2. Certified by FM Approvals

Finishes<sup>(1)</sup>

Sprinkler	Escutcheon
Bronze	Brass
Chrome Plated	Chrome Plated
White Painted <sup>(2)</sup>	White
Lead Plated <sup>(3)</sup>	
Wax Coated <sup>(3) (4)</sup>	
Wax Over Lead <sup>(3) (4)</sup>	

- <sup>(1)</sup> Other finishes and colors are available on special order. Consult factory for details.
- <sup>(2)</sup> White painted sprinklers will have chrome plated can.
- <sup>(3)</sup> 155°F (68°C) to 200°F (93°C) rating only.
- <sup>(4)</sup> 212°F (100°C) brown wax may be used on 286°F (141°C) sprinklers when maximum ceiling temperatures do not exceed 150°F (66°C).

Standard Temperature Ratings

Classification	Sprinkler Temperature Rating		Max. Ambient Temp.	Bulb Color
Ordinary	135°F	(57°C)	100°F (38°C)	Orange
Ordinary	155°F	(68°C)	100°F (38°C)	Red
Intermediate	200°F	(93°C)	150°F (66°C)	Green
High	286°F	(141°C)	225°F (107°C)	Blue

Sprinkler can and escutcheon fabricated of brass for better weather resistance in exterior applications.

Sprinkler Guard: Model C-2

Sprinkler Installation Wrench:

Model G3 Sprinkler Wrench

Sprinkler Identification Number (SIN): R5314

**Note:** The sprinkler can protrudes 1/4" when escutcheon is in nominal position. Escutcheon adjustment provides + 1/4" (+6mm) to -1/4" (-32mm) "A" dimension adjustment range.

Model F3 Dry Pendent Recessed Sprinkler

"A" Dim.	3/2" to 48" (89mm to 1219mm) in 1/4" (6mm) increments
----------	---

Finishes<sup>(1)</sup>

Sprinkler	Escutcheon
Bronze	Brass
Chrome Plated	Chrome Plated
White Painted	White

- <sup>(1)</sup> Other finishes and colors are available on special order. Consult factory for details. Cup remains unfinished. Only the escutcheon will contain desired finish.

Standard Temperature Ratings

Classification	Sprinkler Temperature Rating		Max. Ambient Temp.	Bulb Color
Ordinary	135°F	(57°C)	100°F (38°C)	Orange
Ordinary	155°F	(68°C)	100°F (38°C)	Red
Intermediate	200°F	(93°C)	150°F (66°C)	Green
High*	286°F	(141°C)	225°F (107°C)	Blue

Sprinkler cup and FP Escutcheon fabricated of steel and recommended for interior applications.

\*Listed and Certified only by cULus.

Sprinkler Installation Wrench:

Model G3 R/C Sprinkler Wrench

Sprinkler Identification Number (SIN): R5314

**Note:** Do not install the Model F3 Dry Pendent Recessed Sprinkler in ceilings which have positive pressure in space above.

## Model F3 Dry Pendent Concealed Sprinkler

**"A" Dim.** 3½" to 48" (89mm to 1219mm) in ¼" (6mm) increments

Sprinkler Installation Wrench:

Model G3 R/C Sprinkler Wrench

Sprinkler Identification Number (SIN): R5334

**Notes:** Do not install the Model F3 Dry Horizontal Recessed Sidewall Sprinkler in walls which have positive pressure in their side space.

- Recessed Horizontal Sidewall sprinklers are listed by cULus for installation of min. 4" (100mm) - to - max. 6" (150mm) below ceiling, and FM approved for installation of min. 4" (100mm) - to - max. 12" (306mm).

Technical Data

Orifice Size: 1/2" (15mm)  
Thread size: 1" NPT per ANSI B2.1  
Working Pressure: 175 psi (12 bar)  
Nominal K Factor - US / (Metric): 5.6 / (80)

Product Description

Reliable Model F3 Dry Sprinklers are standard response sprinklers utilizing a durable 5mm frangible glass bulb. Model F3 Dry Sprinklers are intended for use in dry and preaction systems and in areas subjected to freezing temperatures, such as freezers and unheated portions of buildings.

Environments wherein dry sprinklers are employed can be corrosive. For this reason, Model F3 Sprinklers have a special wax fillet placed in the gap between the cup that supports the bulb and the wrenching boss. This wax will not interfere with the operation of the sprinkler, and it prevents contaminants from entering the internal portion of the drop nipple. The wax must not be removed.

Operation

The glass bulb consists of an accurately controlled amount of special fluid hermetically sealed inside a precisely manufactured glass capsule. When the temperature increases sufficiently due to a fire, the bulb shatters allowing operating parts to clear the waterway. This enables the inlet seal to release air or water and subsequently, cause water flow over the deflector in a uniform spray pattern, controlling or extinguishing the fire.

Ordering Information

- Specify:
- Sprinkler Type (select one):
    - Model F3 Dry Pendent
    - Model F3 Dry Recessed Pendent
    - Model F3 Dry Concealed Pendent
    - Model F3 Dry Horizontal sidewall
    - Model F3 Dry Recessed Horizontal Sidewall
  - Sprinkler Temperature Rating.
  - Sprinkler Finish.
  - Cover Plate/FP Escutcheon Finish.
  - Length: "A" Dimension (face of tee to face of ceiling or wall) in 1/4" (6.4mm) increments.
  - Model F3 Dry Pendent (a) is available without sprinkler can and escutcheon.

Note:

- The "A" dimension is based on a nominally gauged pipe thread "make-up" of .600" (15mm) per ANSI B2.1 [7 1/2 threads approximately].
- All platings and paintings are decorative and intended for interior use.
- Acceptable appearance in conditions such as parking garages is generally provided with bronze sprinkler, brass cup and escutcheon for the Model F3 Pendent only.

## General Installation Instructions

Model F3 dry sprinklers must be installed only in standard (ANSI B 16.3 class 150 and ANSI B 16.4 class 125) pipe tees even at branch line ends. For these and other tees including CPVC\*, the dry sprinkler should be installed to conform with protrusion into the tee in accordance with the figures on pages 2 & 3. Dry sprinklers must not be installed into elbows and into pipe couplings located on drop nipples to the sprinklers. The "A" dimension of a dry sprinkler, which extends into a freezer from a wet pipe system, should be selected to provide at least 14" (356mm) between the freezer's outside wall or ceiling and the wet pipe line. When the temperature inside the freezer will be below -30°F (-35°C), increase the 14" to 20" (509mm).

1. Cut the specified size hole (see illustrations) for the sprinkler in the ceiling directly in line with the tee.
2. Apply pipe joint compound to the 1" (25mm) pipe threads and install sprinkler using the Model G3 or G3 R/C Sprinkler Wrench as specified.
3. Install the Model FP push-on / thread-off escutcheon or CCP cover plate if required.

**Note:** Installation of the Model F3 Sprinklers in copper pipe systems is not recommended, as this may reduce the life expectancy of the sprinklers.

## Model F3 Concealed and Recessed Installation Instructions

- The Model G3 R/C Wrench (Fig. 1) is designed to locate on the wrenching pads of the Recessed sprinkler while centering in the cup. A standard ½" drive ratchet may be used to drive this wrench. Figures 1 and 2 show sequentially the insertion of the wrench. First, the wrench, with its jaws above the sprinkler deflector, is moved laterally until centered with the cup. Then raise the wrench inside the cup until its jaws engage the sprinkler's square wrenching pads (Fig. 3). To remove the wrench, follow this procedure in reverse order. Care should be taken to avoid striking the deflector with the wrench.
- Model G3 Wrench (Fig. 4) is used for installation of Pendent and Horizontal sidewall sprinklers.
- Glass bulb sprinklers have orange bulb protectors to minimize bulb damage during shipping, handling and installation. REMOVE THIS PROTECTION AT THE TIME THE SPRINKLER SYSTEM IS PLACED IN SERVICE FOR FIRE PROTECTION. Removal of the protectors before this time may leave the bulb vulnerable to damage. RASCO wrenches are designed to install sprinklers when covers are in place. REMOVE PROTECTORS BY UNDOING THE CLASP BY HAND. DO NOT USE TOOLS TO REMOVE THE PROTECTORS.

## Maintenance

The Model F3 Dry Sprinklers should be inspected quarterly and the sprinkler system maintained in accordance with NFPA 25. Do not remove the factory applied thermally sensitive wax fillet between the bulb supporting cup and the wrenching boss. Do not replace this wax with a substitute substance. An Alternate substance may interfere with proper operation of the sprinkler. Do not clean sprinklers with soap and water, ammonia or any other cleaning fluids. Remove dust by using a soft brush or gently vacuuming. Remove any sprinkler which has been painted (other than factory applied) or damaged in any way. A stock of spare sprinklers should be maintained to allow quick replacement of damaged or operated sprinklers. Prior to installation, sprinklers should be maintained in the original cartons and packaging until used to minimize the potential for damage to sprinklers that would cause improper operation or non-operation.

\* Spears CPVC sprinkler adapter tees (with steel thread insert) can only be used with horizontal sidewall sprinklers which do not require protrusion into tees to prevent ice or debris blockage of sprinkler inlets. These CPVC tees do not permit sufficient sprinkler inlet protrusion as required for pendent installation.
